

BHOOMPALLY KALYAN REDDY

AI-POWERED FULL-STACK ENGINEER

Hyderabad, India | +91 6305013340 | Email: prsnlkalyan@gmail.com

Portfolio & Demos: [kalyanport.netlify.app](#) | GitHub: [github.com/kalyan-1845](#) | LinkedIn: [linkedin.com/in/bhoompally-kalyanreddy](#)

PROFESSIONAL SUMMARY

Driven 3rd-year Computer Science student targeting remote Full-Stack or Backend Engineering internships. Differentiated by a track record of deploying 30+ open-source utilities and building highly optimised web applications (Next.js/React.js) and FastAPI microservices.

CORE SKILLS

Next.js · React.js · FastAPI · Node.js · Python · TypeScript · Celery · Docker · AWS EC2/S3 · GitHub Actions · CI/CD
Flutter/Dart · SQLite / SQL · RESTful APIs · C++ · CrewAI / RAG · Ollama · OCR / NLP

PROFESSIONAL & RESEARCH EXPERIENCE

Founder & Lead Full-Stack Engineer — AuraCore Command Dashboard (Personal Project)

Jan 2026 – Present

React.js · Next.js · FastAPI · Python · Celery · SQLite · Docker

- Engineered a responsive Next.js analytics command dashboard integrated with a high-throughput FastAPI backend — RESTful APIs and SQLite schema manage server settings and trial-key licensing tables.
- Built Celery/local-queue pipelines handling 100+ daily server events with 98% uptime and zero downtime during peak usage.
- Implemented secure database-backed licensing with trial keys protecting IP during local distribution.

Software Research Assistant — IJARSCT International Journal

Mar 2026 – Apr 2026

Published: "Sarathi: Smart Emergency Navigation System" | DOI: [10.48175/IJARSCT-32733](#)

- Developed a client-server mobile application using Dart/Flutter, implementing real-time GPS coordinate triangulation for emergency vehicle tracking.
- Built high-performance, low-latency WebSocket interfaces in the Python backend to synchronize live location updates with mobile client UI states.

FEATURED FULL-STACK PROJECTS

DocuShrink AI — Serverless Document Suite

■ 25+ Stars

React.js · TypeScript · Tesseract.js · PWA · Tailwind CSS

- 10 client-side tools — \$0 hosting, zero server or API cost
- Offline PWA with OCR across 13 languages via Service Workers
- Links: [Live App](#) | [GitHub](#)

NeuralGuard — Cybersecurity Framework

■ 15+ Stars

C++ · Real-Time Monitoring · Native Process Hooking

- Developed a C++ process monitoring service hooked into native OS process execution events using low-level API listeners.
- Configured a local SQLite database logging layer to audit event records with zero external network overhead.
- Links: [GitHub](#) | [Demo Video](#) | [Setup Guide](#)

BKR 2.0 — Offline Voice Assistant Socket Service

■ 20+ Stars

Python · Sockets · Audio Stream Buffering · Subprocess Pipes

- Engineered a private Socket.io service in Python to process incoming audio streams, serving offline transcription request states.
- Piped voice feeds to local inference subprocesses; optimized audio stream buffer boundaries to decrease latency to under 200 ms.
- Links: [GitHub](#) | [Setup Guide](#)

EDUCATION

ACE Engineering College, Hyderabad (Affiliated to JNTUH)

2024 – 2028

B.Tech in Computer Science and Engineering | CGPA: 8.3 / 10

Relevant Coursework: DSA, DBMS, Operating Systems, Computer Networks

ACHIEVEMENTS & CERTIFICATIONS

- Ranked Top 4 / 200+ in ACE Code Sprint 2026 | Top 7 in KL University National Hackathon | Deployed 30+ open-source utilities.
- Certifications: Python Programming (IIT Bombay) | Generative AI Mastery (OutSkill) | Claude AI Professional (Anthropic) | IA Online Technical Training.
- Languages: English (Professional) | Telugu (Native) | Hindi (Conversational)
